Mohd Maaz

Aspiring Software Engineer — Python Developer — Front-End Enthusiast

MohdMaaz000 | Maaz Shaikh | Portfolio | Mohd.maaz.040323@gmail.com

SUMMARY

Goal-driven software engineer in training with applied experience in Python development, front-end engineering, and database-driven systems. Competent in building responsive interfaces, implementing modular backend logic, and delivering production-ready academic and personal projects. Experienced with object-oriented design, modern web technologies, and structured data workflows. Executes tasks independently with clarity and adapts quickly in collaborative, iterative environments.

PROJECTS

Portfolio Website   [Link]

Developed a responsive personal portfolio showcasing skills, projects, and achievements using HTML, CSS, and JavaScript. Structured with clean UI components and an optimized layout.

CampusConnect   [Github]

Built a campus networking platform enabling resource sharing, authenticated access, and student–faculty interaction. Implemented dashboards, notifications, and modular features using HTML, CSS, and JavaScript.

Weather App   [Github]

Created a real-time weather application using HTML, CSS, JavaScript, and the OpenWeatherMap API. Displays temperature, humidity, and dynamic weather conditions through a responsive interface.

EDUCATION
